

SAIRAJ SERIGARA

Aspiring Data Analyst | Python · SQL · Power BI · Data Visualization

sairajsherigar5@gmail.com | 8431053243 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data-focused Computer Science Engineering student (2027) with hands-on experience in SQL, Python, Advanced Excel, and Microsoft Power BI. Skilled in data cleaning, data transformation, exploratory data analysis (EDA), statistical analysis, dashboard development, KPI reporting, and business intelligence. Proficient in using Pandas, NumPy, Matplotlib, and Seaborn to analyze datasets, generate actionable insights, and support data-driven decision making. Seeking a Data Analyst internship to apply analytical, problem-solving, and data visualization skills.

TECHNICAL SKILLS

- **Programming:** Python, SQL, Advanced Excel
- **Data Analysis:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Wrangling, Statistical Analysis, Data Visualization, Business Intelligence, KPI Reporting
- **Power BI:** Microsoft Power BI, Power Query, DAX, Dashboard Development, Data Modeling
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Tools:** Git, GitHub, Jupyter Notebook, Microsoft Excel

PROJECTS

Power BI E-Commerce Analytics Dashboard — Power BI, Power Query, DAX

- Developed an interactive Microsoft Power BI dashboard to analyze sales performance, customer behavior, revenue, and profitability across multiple product categories and regions, enabling data-driven business decisions through KPI visualization.
- Performed data cleaning, data transformation, and data validation using Power Query to prepare raw transactional datasets for reporting, improving data quality and analysis accuracy.
- Created advanced DAX measures, calculated columns, and KPI dashboards to monitor revenue, profit margin, and customer retention while improving business reporting and dashboard performance.

Open Source Contributor Analytics — Python, Pandas, NumPy, Matplotlib, Seaborn

- Developed a Python-based data analytics pipeline using Pandas and NumPy to collect, clean, transform, and analyze GitHub repository data for business intelligence and trend analysis.
- Performed exploratory data analysis (EDA), data preprocessing, and statistical analysis to identify contribution trends, repository activity, and developer performance metrics.
- Designed interactive data visualizations using Matplotlib and Seaborn to communicate analytical findings, performance trends, and actionable insights to stakeholders.

HACKATHONS & COMPETITIONS

- HACKOTHSAVA 2025 — National Level Hackathon, SMVITM, Bantakal
- SRISHTI 2026 — State Level Project Exhibition & Competition, SDM College of Engineering & Technology
- EPOCH'26 — National Level Hackathon, Vemana Institute of Technology, Bengaluru
- Cepheus — GDG Hackathon, Atria Institute of Technology, Bengaluru

EDUCATION

Bachelor of Engineering — Computer Science Engineering *Expected 2027*

Shri Madhwa Vadiraja Institute of Technology & Management (SMVITM), affiliated to Visvesvaraya Technological University (VTU)

Database Management Systems (DBMS), Data Structures & Algorithms, Probability & Statistics, Discrete Mathematics, Data Analysis, Business Intelligence, Database Design, Statistical Computing
